# OPEN MINDED DESIGN

### **OPEN**

Pho Dong Living opens living spaces to global influences, mixing genres and ideas from around the world.

### **MINDED**

Pho Dong Living energizes, marrying creativity and functionality in innovative and accessible lifestyle solutions.

### **DESIGN**

Pho Dong Living is new concept in design that meets the need for comfort and durability, stylishly balancing originality with value.

**Pho Dong Living is member of the DVK ASIA GROUP**

## TABLE FURNITURE

Proffice is the workplace solution for all who want to stay successful. Supporting multiple work cultures and work styles, Proffice creates energizing environments to facilitate creativity and collaboration. Proffice is flexible, versatile and responsive.

## TABLE FURNITURE

Proffice Storage, designed to complement the desk system in the immediate working environment, allows the efficient storage of files and quick access to equipment. The flexible storage solutions can also serve as visual screens, seating areas or spontaneous meeting zones.

Adaptability Change is an inherent part of our everyday work. And with increasing speed, the requirements of interaction in companies are also changing. The modular supporting structure of Proffice permits the configuration of a wide variety of office layouts for various tasks. Whether as a bench for temporary communicative collaboration or a 4-person team workplace for project work, Proffice can be adapted at any time to changing user requirements resulting in a sustainable office structure.

## TABLE FURNITURE

**Concentration & Communication**

Proffice enables a multitude of individual workplace designs from the individual work station to complex and creative office environments. Anchored screens give shape to the room, provide visual cover, and thereby boost concentration while sideboards with seat cushions, on the other hand, offer the possibility of informal communication directly at the work station.

## TABLE FURNITURE

Some jobs in the office are still needing a bigger storage space as it happens frequently in Administration, or Finance departments, therefore Proffice is using a structural “storage spine” to help people getting massive filing capacity directly on the desk. Recent studies have demonstrated that this planning solution is helping saving floorspace and reducing the need of the usual corridors made by filing cabinets. Storage units with three different heights will also provide a different level of privacy between people.

## TABLE FURNITURE

Linear workstations will be very easy to be created with practically no-limit length, due to the smart strong shared structure. Structural storage units (independent or shared) can have in their lower version, the one with the correct height for sitting comfortably, a cushion for hosting short informal meetings with colleagues directly at the desk, avoiding the need of small meeting tables, saving floorspace.

## TABLE FURNITURE

Cultural differences and evaluation of design in different countries are very well respected in TAV, therefore Proffice offers different styles of legs, squared, rectangular, or side panels to provide a complete privacy and visual cleanness. In the same project, desks could have a different esthetic or color, in order to better identify Departments, all sharing same components, that will allow full flexibility for further changes in the organization and very low inventory.

## TABLE FURNITURE

A working space is a living space; it is communication. In companies, people come together to talk to one another, in meetings, discussions, conferences, presentations. Proffice provides the necessary work equipment for this in various forms, from meeting tables to flexible conference facilities.

## TABLE FURNITURE

The square leg of Proffice is a solid basis on which developing several solutions for many meetings places, full of prestige and opportunities: from the individual table for informal meetings with colleagues and partners, to large-size compositions, obtained by freely combining square, rectangular or terminals plans

## TABLE FURNITURE

## TABLE FURNITURE

## TABLE FURNITURE

This is where value evolve and are negotiated, where information is turned into decisions supported by modern media. We create a valuable place where the development and success of companies are led. Gather prestigious feelings and absolute minimalism, in a new style: This is the philosophy of Proffice Meeting, a table system in which the bare and simple perimeter structure, in metal white or black finish, surrounds and supports the wood top, available in several versions of walnut and oak malamine natural

## TABLE FURNITURE

Large tables to accommodate the busiest meetings, or individual tables for exclusive meetings, always with a unique and recognizable form factor: the rectangular profile of the legs that creates multiple games of lines and surfaces. This is the Proffice project proposal for the meeting space, complemented by matching side tables, cabinets and accessories.
